Anchor Plan Student Learning Outcome 3

Practice Hope College's Virtues of Public Discourse: humility to listen; hospitality to welcome; patience to understand; courage to challenge; honesty to speak the truth in love.

Assessment Schedule

A report of assessment results is prepared every two years in the summers of even years.

Assessment results are reviewed by the General Education Council in the Fall Semesters of even years.

Assessment Tool

The assessment tool is the Analyze and Act Component of the HEIghten Intercultural Competency and Diversity Assessment developed by ETS and administered online through the Territorium platform (Attachment A). Specifically, the Analyze and Act sub-scores of self-awareness, cultural knowledge application, suspending judgment/perspective taking, social monitoring, Assessment Sample and Process

The assessment is administered by the Frost Center for Data and Research. Students enrolled in the First-Year Seminar in the Fall Semester of each year complete the Intercultural Competency and Diversity Assessment as one portion of a larger discussion of diversity and inclusion.

The assessment is opened for first-year students in August of each year and closed in May. A link to the assessment and instructions are provided to students on the First-Year Seminar Moodle site. Individual instructors assign their students the assessment as it best fits within their course schedule and curriculum.

The Director of Assessment and Accreditation works with the faculty members teaching at the Muskegon location to administer the assessment.

Senior Students

Senior Seminar is mapped to Anchor Plan Outcome 3. Students enrolled in the Senior Seminar each semester (Summer Session, Fall, and Spring) receive an online invitation to

Description of the Examination

The HEIghten® ability to demonstrate central aspects of ICD:

Approach the overall positivity with which an individual views and responds to cross-cultural interactions; and

Analyze and Act the ability to take in, evaluate and synthesize relevant information without the bias of preconceived judgments and stereotyped thinking; then translate that information into action while maintaining control in potentially challenging and stressful situations.

For the **Approach** dimension, test takers are asked to self-report on their reactions to hypothetical situations in ways that demonstrate their:

1. **Tolerance of ambiguity** or ability to maintain composure and well-being in uncertain situations without compromising effectiveness; and
2. **Positive cultural orientation** or evaluation of cross-cultural situations as favorable; and
3. **Cross-cultural self-efficacy** or belief that they can successfully engage in cross-cultural situations.

For the **Analyze and Act** dimensions, test takers are assessed in several areas.

For the **Analyze** dimension, areas of emphasis include:

1. **Self-awareness** The degree to which an individual understands the impact of their own culture, values, preferences and previous experiences on his or her cognitive, emotional, and behavioral responses
2. **Social Monitoring** Attention to the physical, verbal and nonverbal behaviors and cues and signals in actions
3. **Suspending Judgment/Perspective Taking** Active consideration of others' potential viewpoints/Active refrainment of preconceived cultural schema interfering with information processing
4. **Cultural Knowledge Application** Utilization of relevant declarative cultural knowledge in an interaction

For the **Act** dimension, test takers are

Format of the Examination

The HEIghten® Intercultural Competency and Diversity test features two types of tasks.

For the **Approach** domain, **Likert-type** items present test takers with a set of short statements with which they are asked to rate their agreement on a 4-point scale. Items are designed to be accessible and easy for students to relate to.

The **Analyze and Act** dimensions are assessed with **situational judgment** test items, which follow the Likert items. Test takers are presented with a range of cross-cultural scenarios and questions relating to each scenario.

In single-select or multiple-select multiple-choice formats, test takers are asked to indicate the best or most appropriate response or responses with the aim of creating or maintaining positive interactions and relationships in cross-cultural settings.

The scenarios or situations are set in the following contexts:

- Study abroad
- Teaching abroad
- Travel (work or leisure) abroad
- International teamwork
- Guests from another culture
- Subcultures within the U.S.

The scenarios describe situations that may be different from those that are common in the test taker's own culture. Test takers are asked to make a decision on how best to react, or local values may seem somewhat ambiguous. A positive resolution suggests the knowledge, skills, or abilities that are being measured.
